

Celebrating **50**
years 1959-2009

Water Research Laboratory

Open Day

Saturday, 4th July, 2009

between 9 am and 2 pm

at 110 King St, Manly Vale (near Manly Dam)

The Water Research Laboratory is a unique facility undertaking various water engineering studies. A major component is the construction and testing of waves and water flow in large scale physical models of breakwaters, desalination plants, dams and spillways.

With several physical models on display, the Open Day is a great opportunity to visit WRL. We invite you to come and see the expanse and resources of WRL, and observe a range of physical models in action.

For more information about WRL please visit: www.wrl.unsw.edu.au
